

BRITISH
FIRES

PRODUCT BROCHURE

WELCOME TO

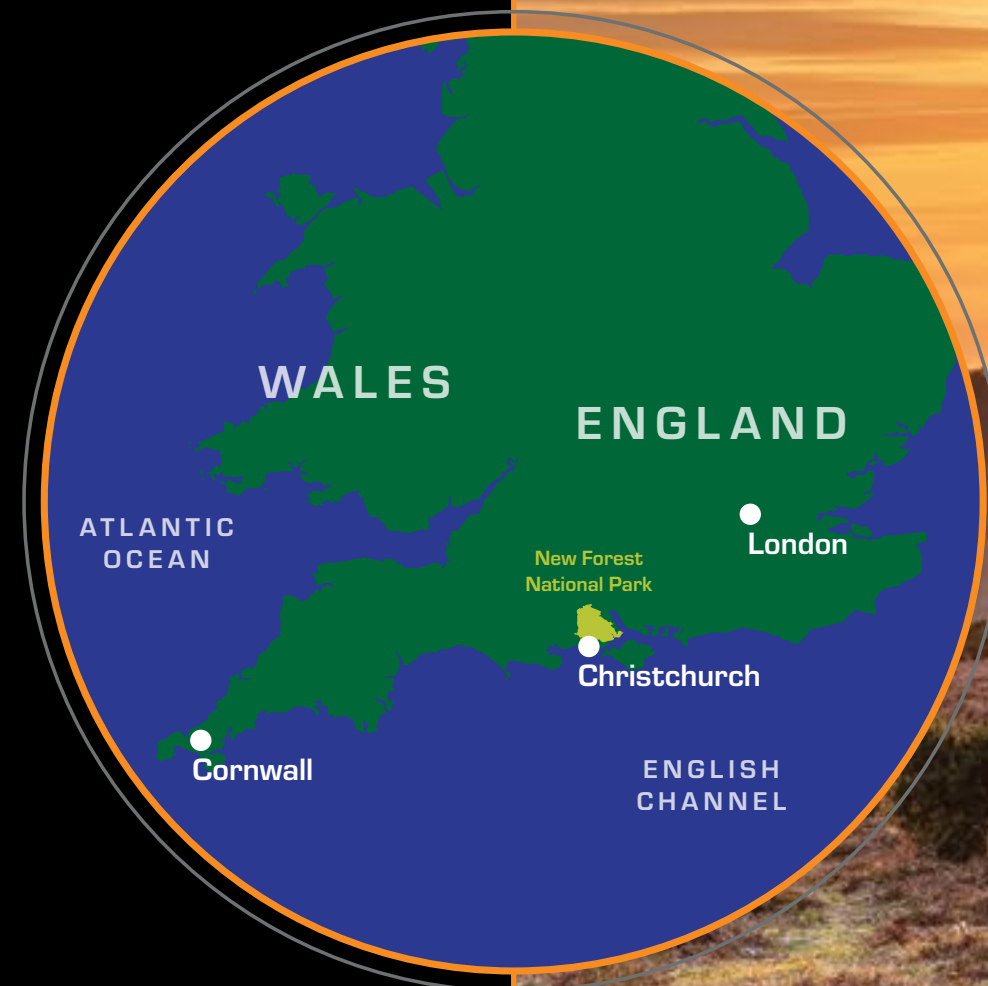

At British Fires the design and development team has one mindset, uncompromising quality, which drives us to deliver top-end products. Our aim is to help you create a peaceful and relaxing environment. Ever since the inception of the New Forest 1200 Electric Fire we have continued to develop and attain a reputation for excellent products and customer support. Our award winning LED flame-effect and patented Air Curtain Technology continue to impress clientele from California to Qatar.

We think you will enjoy exploring our collection of products in this brochure. It offers inspiring installations from the illustrious wall insets and charming wall hung suites to sleek stoves – there is something for everyone.

Located on England's beautiful south coast is the New Forest National Park – the inspiration of our electric fireplaces.

The New Forest covers 219 mi² and is home to many parks, farms, golf courses, and outdoor activities. Today, the New Forest is populated mostly by birch, beech, conifers and oak trees. There are also vast areas of heathland due to cultivation from the Bronze Age and prior which gives the National Park its unique terrain and geography.

This diverse makeup of the New Forest is what gave us the inspiration to design the Forest View fuel bed setting that comes standard with every fireplace.

DELUXE REAL LOGS

Upgrade your fuel bed view and create the ultimate experience with Deluxe Real Logs.

What better way to demonstrate a burning fire than by using real logs? The natural detail of the logs create an authentic look and ambience which enhances the overall interaction between flame-effect and fuel bed.

Requires additional purchase for all New Forest models. Deluxe Real Logs are standard for the Knightwood, Holbury and Hinton. Signature Logs and Diamond Light Crystals are not included with Deluxe Real Log upgrades.

Available with all **British Fires** models

@britishfires

THE MAKING OF

DELUXE REAL LOGS

Each Deluxe Real Log is unique and artisanally crafted using actual English Oak logs found in nature. They enhance an already prominent statement piece and will take any viewer by surprise — especially when you tell them that they are real logs.

The development process of the Deluxe Real Logs fuel bed begins by selecting different sized logs and cutting them to be fit and arranged on the fuel bed tray. To finish the look the logs are scorched and charred. Then, bark, wood chips and twigs are added to the fuel bed and set into place with a resin.

The end result is a realistic fireplace that will add warmth to any room.

GUARANTEE

At British Fires we pride ourselves on quality and performance, so much so, that each British Fires electric product is applicable for a 3-year guarantee when purchased from an authorized dealer. Full warranty terms and conditions are available to view at: www.britishfires.com/guarantee

All appliances must be installed in a correctly ventilated space in accordance with the manufacturer's installation instructions and the rules in force. This brochure is for guidance only and is not intended to replace the installation manual, which provides more detailed information. January 2024. British Fires®

New Forest Electric fires are protected by Patent Numbers:
UK Patent Number: GB 2583055 B
European Patent Number: EP 3 667 171 B

This brochure was correct at publication; however, as our policy is one of continual development and improvement, specifications may be subject to change. Any such changes will not adversely affect the performance or safety of the appliance.
